

Why Healthcare Organizations Need a Downtime Solution in 2025

Is your healthcare facility ready
for EHR downtime in 2025?

Risk 1: Compromised Patient Safety

When systems go down, access to vital patient info is delayed, increasing risks to patient safety.

Risk 2: Financial Loss

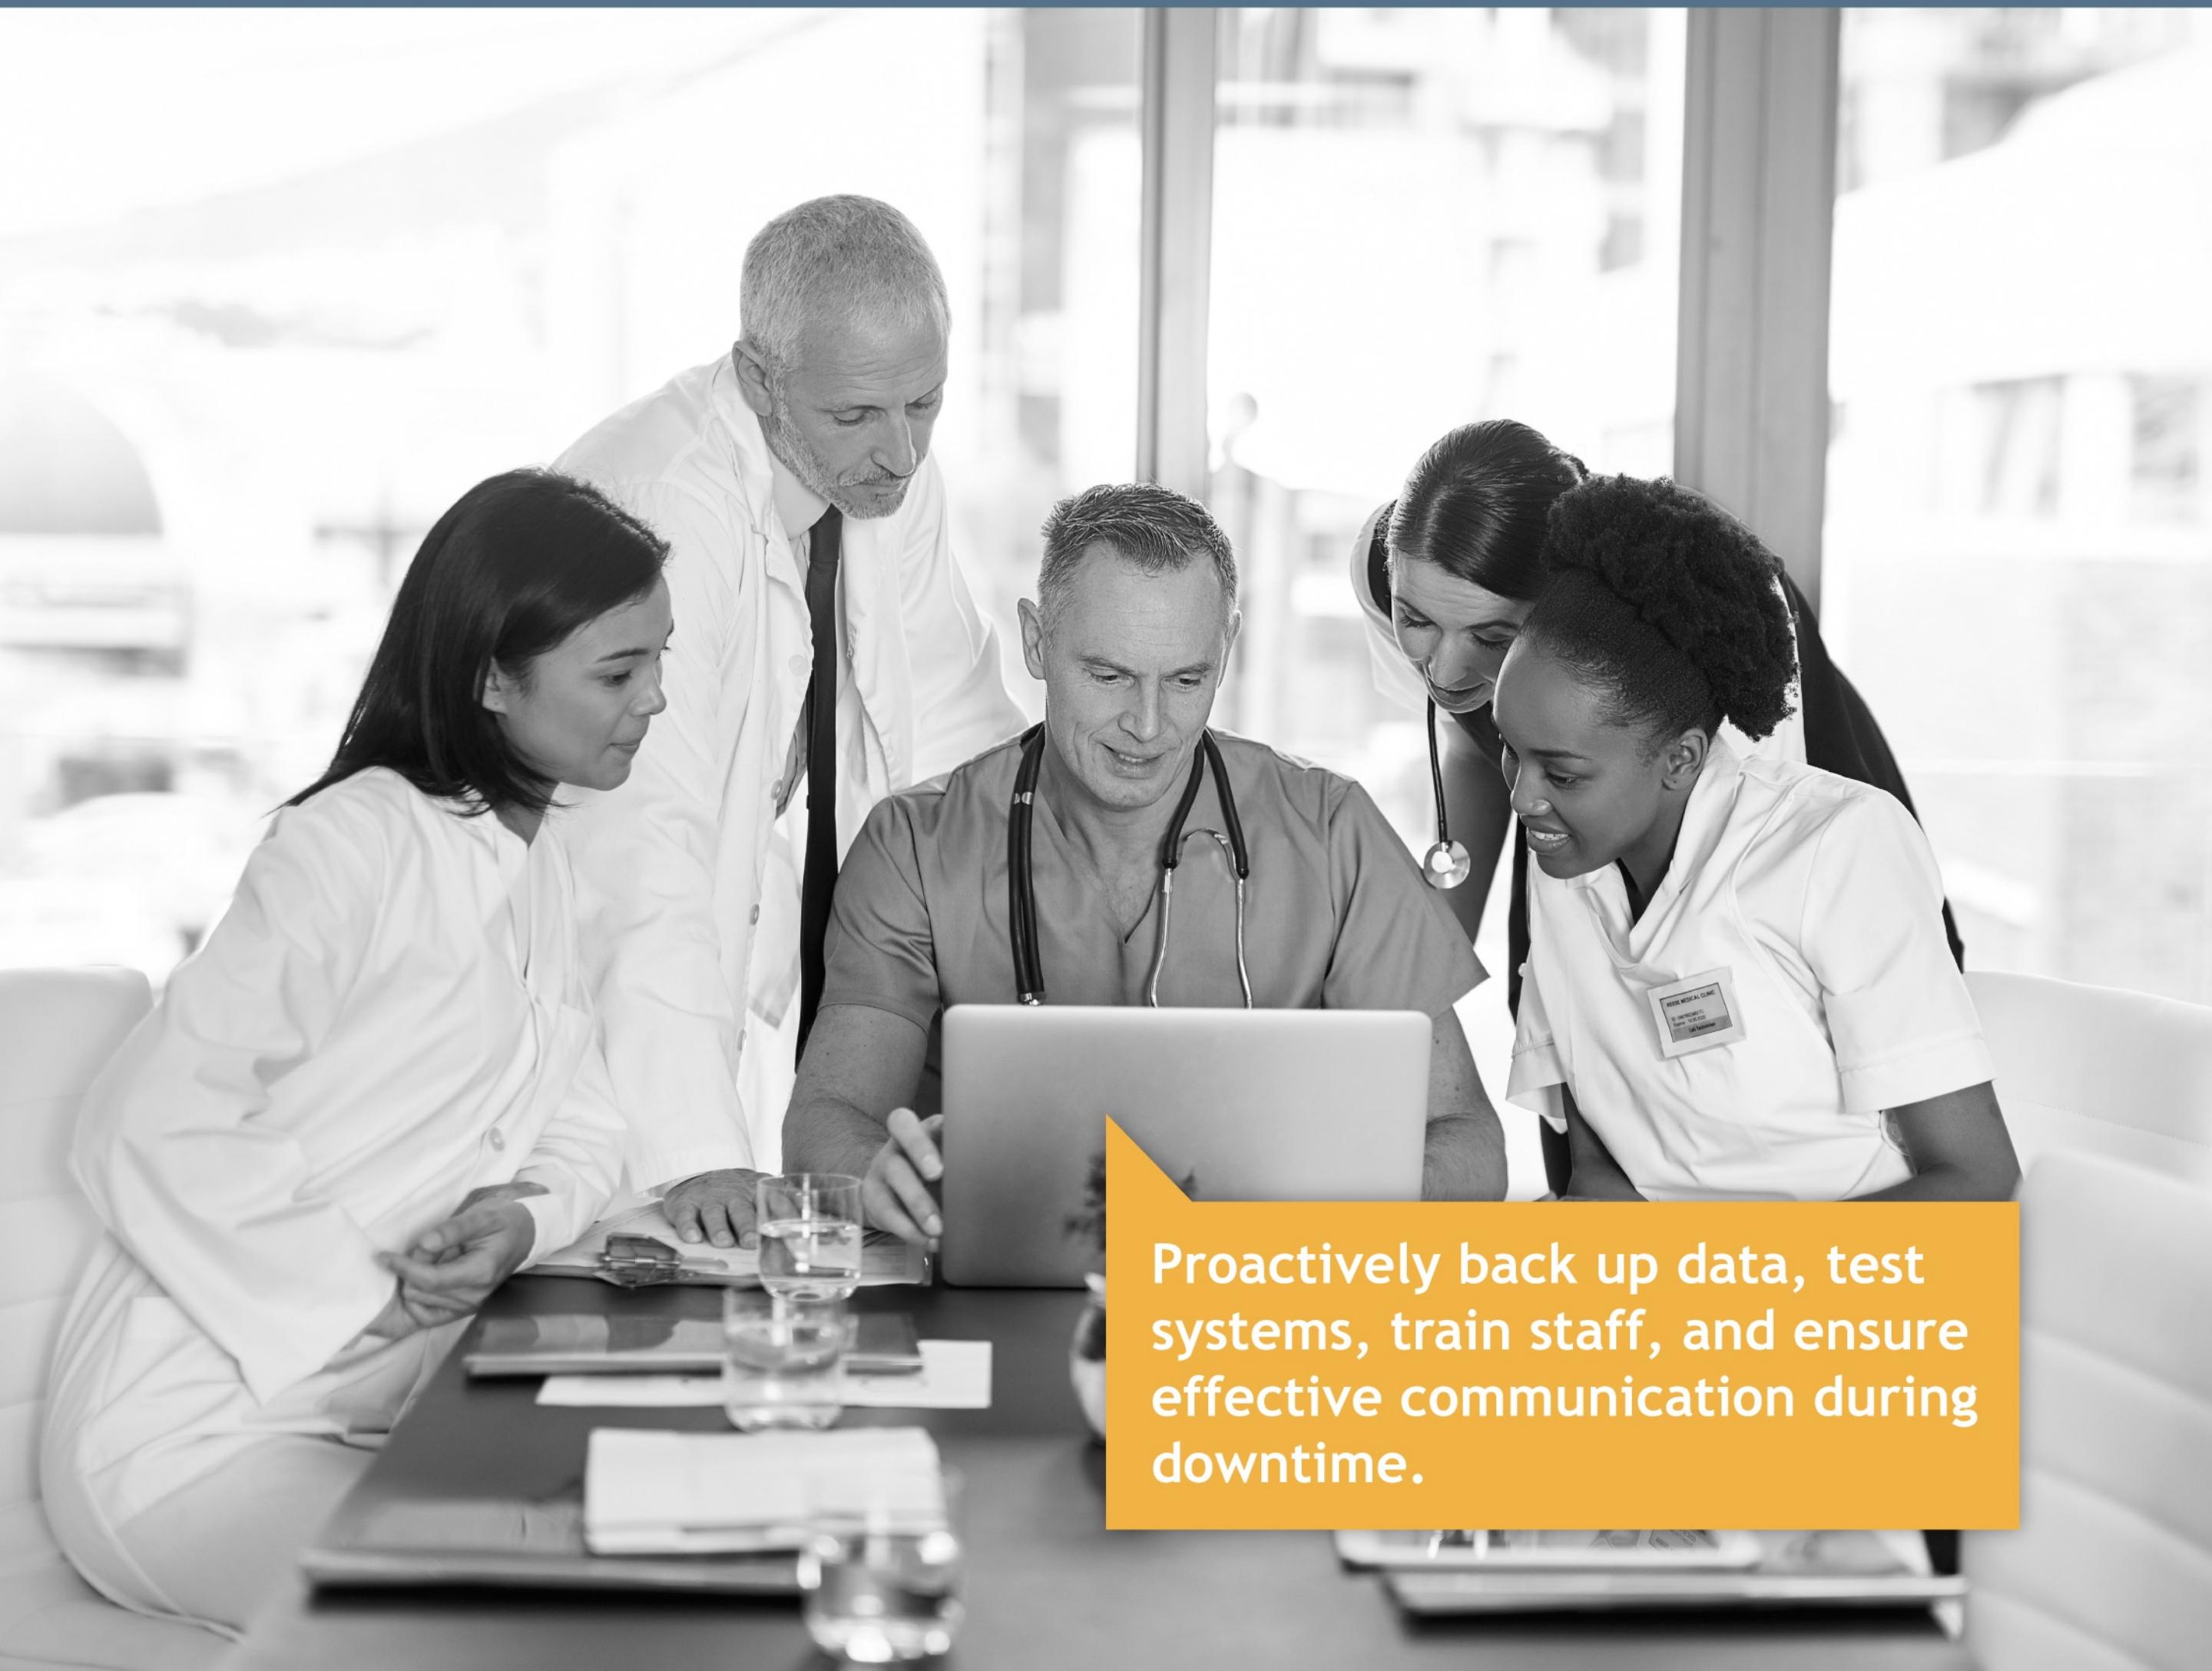

EHR downtime can cost hospitals
\$25,000 per minute,
impacting revenue and adding
recovery costs.

Risk 3: Data Vulnerability

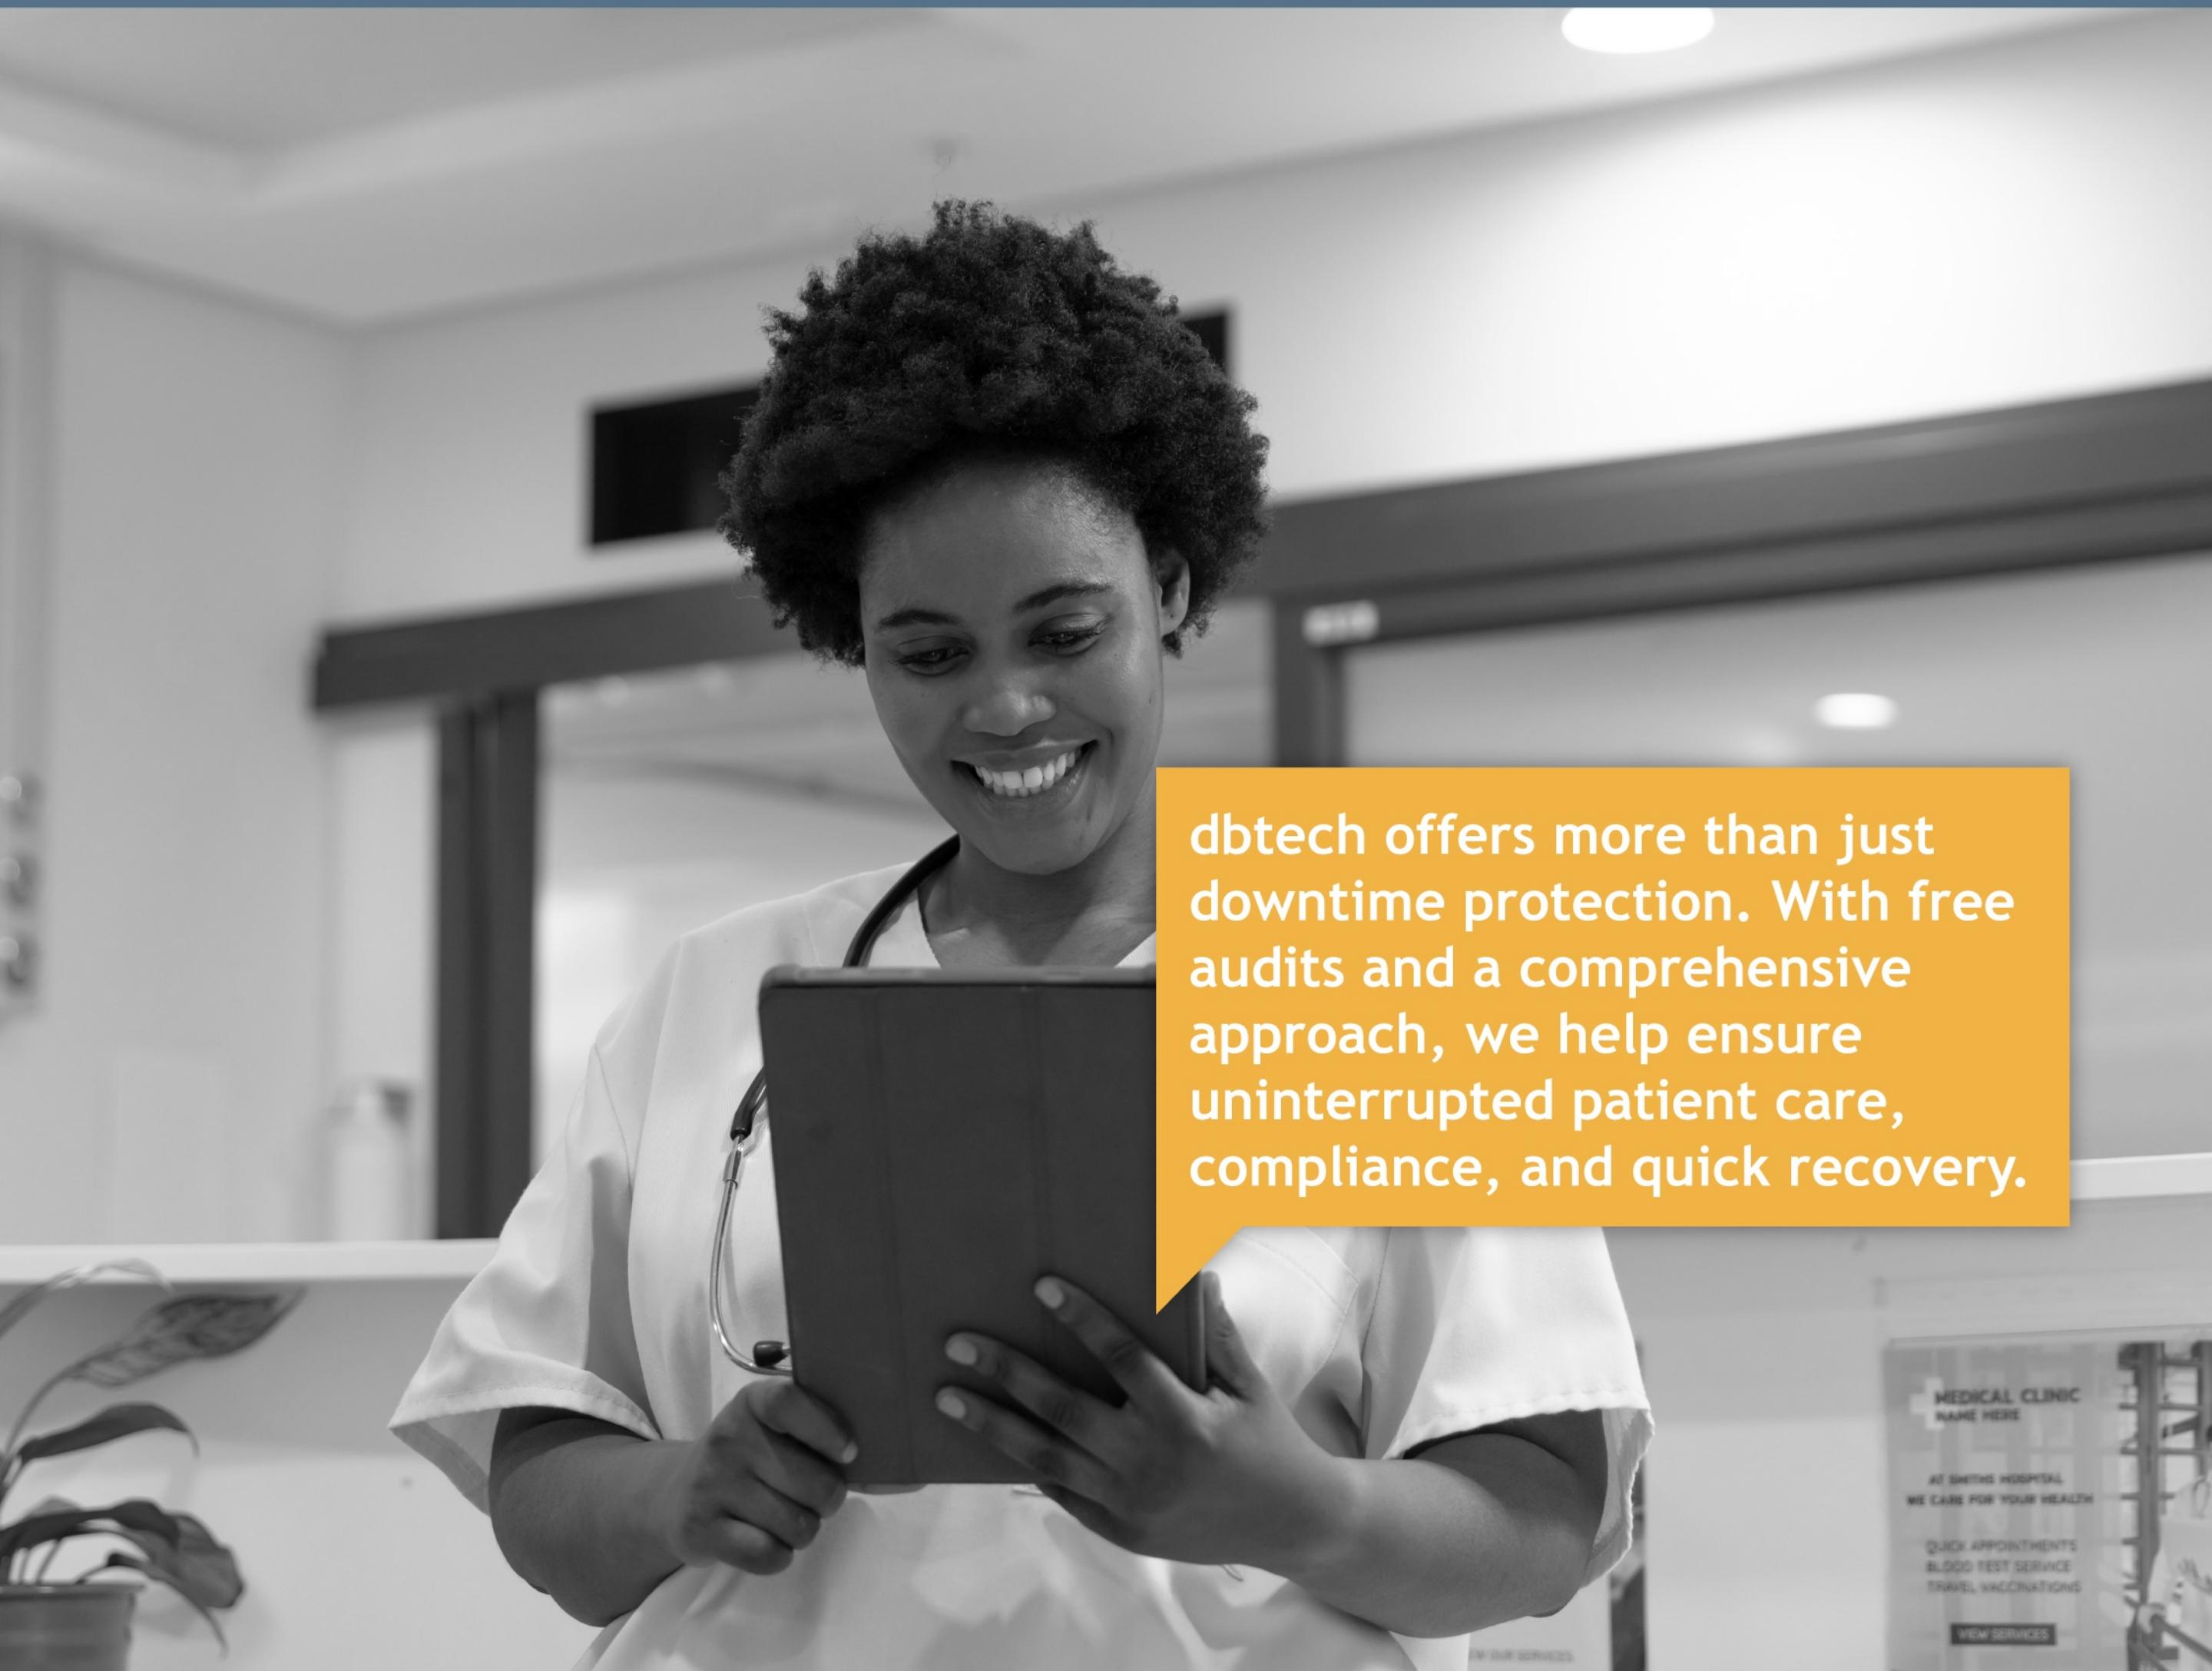

Downtime events heighten the risk of unauthorized access and potential data breaches.

How to Prepare for Downtime

Proactively back up data, test systems, train staff, and ensure effective communication during downtime.

Why Choose dbtech

dbtech offers more than just downtime protection. With free audits and a comprehensive approach, we help ensure uninterrupted patient care, compliance, and quick recovery.

Protect your healthcare organization today – contact dbtech to learn more about our solution.
